

AI Tools Used :

- **Anthropic Claude API** – Intelligent schema analysis and column-to-Faker mapping for synthetic data generation.
- **Claude Code** – Assisted with architecture design, implementation planning, debugging, and code refinement.
- **Google Gemini 3.1 Pro** – Used for solution brainstorming, code reviews, and alternative implementation strategies.
- **Stitch** – Assisted in UI design, prototyping, and frontend workflow generation.
- **Antigravity** – Used for rapid feature development, code generation, and iterative project refinement.
